The area is subject to continuous forestry operations, vegetation is in various stages of growth, and new cuts are possible.

Roads and trails are shown to the best of our data, and are very reliable. However, some new roads and trails may have been developed, some existing trails may be unmapped, and some trails may be overgrown.

Streams are shown to the best of our data.

The location of smaller brooks and streams are not always reliable or mapped, also some seem to dry out or go underground.
